CET'S CUSTOM APPROACH

We pride ourselves on academic excellence and the highest standards of program management. This is no different for the custom programs we operate in partnership with educational institutions. We are excited to work with faculty and international offices who align with the CET mission to develop academically rigorous and culturally eye-opening experiences for students.

PROGRAM DEVELOPMENT PROCESS

We work alongside you every step of the way. It all starts with an intake call 9 to 24 months before the program departs, but the earlier the better—some sites fill to capacity up to a year or more in advance. From there, the process is personalized to your program needs.

Our custom programs team provides first-in-class support from proposal through re-entry. US-based program managers work with you to prepare you and your students for the experience abroad. Then, on-site custom program staff take over when you arrive and work with you to make your vision a reality.
