

## Syllabus of Record

**Program:** CET Prague

**Course Code / Title:** (PR/ECON 330) Migration and Remittances: Global Principles and the EU

**Total Hours:** 45

**Recommended Credits:** 3

**Primary Discipline / Suggested Cross Listings:** Economics / International Business, Finance, Global Studies

**Language of Instruction:** English

**Prerequisites/Requirements:** Intermediate Microeconomics / Intermediate Macroeconomics / Statistics required

---

### Description

The course focuses on current challenges in defining migration and remittances as well as in compiling and collecting reliable statistics. Economic analysis of migration is included to address the question of the impact of migration on the domestic labor market. Furthermore, sustainability and development aspects are discussed, both of which are strongly related to the concepts of migration and remittances. The course also emphasizes the specifics of the European Union (EU) area, both in terms of migration and remittances. From a methodological standpoint, students learn to look for primary data in databases (Eurostat, World Bank), to download the data, conduct data wrangling, and apply statistical analysis on their own datasets. Of particular focus is identifying data issues and interpreting the data which are especially relevant for migration and remittance statistics.

### Objectives

By the end of this course, students will learn to:

- recognize and distinguish between formal definitions of migration and remittances
- describe and practically apply terminology relevant to the course topic
- interpret persistent issues linked to migration, such as conflict-driven and environmental migration
- analyze datasets related to migration, remittances, and the labor market
- compare the significance of dataset analysis
- prepare relevant statistics to assess policies that impact migration and remittances
- identify the risks of over-reliance on inward remittances
- understand the specifics of the EU in terms of migration and remittances

### Course Requirements

Active participation is essential in this course. Students are expected to attend each class and field study course component, as outlined in the CET Attendance Policy. Students are expected to read all assigned materials before the relevant class session and come prepared to participate thoughtfully in class discussions.

## Syllabus of Record

Graded assignments include:

- Individual assignments: Students will identify and analyze datasets relating to international migration, remittances, and the labor market. They will also compare the significance of this criteria and engage in a discussion of the findings.
- Group assignments: Students will work with peers to analyze and discuss various policies that impact migration issues and outcomes in the EU, including preparing relevant statistics in a comparative perspective.
- Term paper: Students write a 12-page term paper, which consists of a case study on the topic in a selected EU country.
- Mid-term exam: Content covers the material in the first part of the course.
- Final exam: Content covered is comprehensive from Parts 1 and 2 of the course.

### Grading

Participation	10%
Individual assignments (2 @ 5% each)	10%
Group assignments (6 @ 5% each)	30%
Mid-term exam	20%
Final exam	30%

## Outline of Course Content

### Part 1: Migration

Topic 1 - Introduction to migration and main historical trends of international migration

- Migration policies – general overview and the case of the EU countries
- Distinction between intra-EU migration and migration from non-EU countries
- The Schengen area

Topic 2 - Defining international migration and distinguishing between statistical definitions and policy/research-oriented definitions

- How international migration is defined for statistical purposes
- Alternative definitions of international migration of academic/policy interest

## Syllabus of Record

- The advantages and disadvantages of various data sources (population censuses, surveys, national registers etc.) for migration data

### Topic 3 - Economic analysis of migration

- Basic model
- Model with skill groups
- Model with shift in demand for labor

### Topic 4 - Migration and sustainability

- Brain drain
- Environmental migration
- Conflict-related migration
- Population ageing

### Topic 5 - Migration in Eastern and Central Europe

- Evolution after the fall of the Iron Curtain
- Reaction to the migration crises (2015-2016 and 2022-2023)

## Part 2: Remittances

### Topic 6 - Remittances in the Balance of Payments

- Evolution of definition of remittances in the IMF Balance of Payments (BoP) framework
- Persisting issues with the BoP definition
- Recent changes in how remittances are defined
- Ongoing issues associated with the current definition

### Topic 7 - The challenge of collecting and compiling data on remittances

- Remittance data sources and remittance channels, remtechs
- Issues with bilateral remittance dataset published by the World Bank

### Topic 8 - The most common methodology to collect remittance data – the case of the Czech Republic and Moldova.

- The Czech Republic is presently engaged in the process of redesigning its data collection methodology. The readings will aid in comprehending the current data collection design, class discussion will help to identify primary issues, and endeavor to suggest improvements for the existing methodology.

## Syllabus of Record

- The case of Moldova will present the perspective on a remittance recipient country with a very different methodology to capture remittance data. Advantages and limitations of this methodology will be addressed.

### Topic 9 - The cost of remitting

- Measuring remittance costs (indicators)
- Remittance costs structure (fee and exchange rate margin)
- Policy measures to cut down remittance costs

### Topic 10 - Remittances and the development nexus

- The benefits and risks in recipient countries
- Remittance and development policies
- Diaspora and the potential of diaspora finance
